150.15**SmartTouch™ Subscription Services**

Note: The residence and business service elements of this item are forborne from regulation in certain exchanges, as identified in Item 100.21 and Item 100.23, respectively.

1. Service Description

SmartTouch™ services are network-based line features that provide residential, single-line business, and multi-line business customers with improved means of managing incoming calls and reaching busy parties.

2. Available SmartTouch Services*

The following types of **SmartTouch** services are available:

- Block The Blocker
-
- Call Display
- Call Forward Busy
- Call Forward Don't Answer
- Call Forward Remote Activation
- Call Forward Universal
- Call Return
- Call Waiting
- Data Ident-A-Call
- Ident-A-Call
- Intercom
- Name Display
- Selective Call Accept
- Selective Call Reject
- Speed Calling
- Three Way Calling
- Visual Call Waiting

D

*Some feature restrictions apply for multi-line business network accesses with hunting capabilities.

SmartTouch Subscription Services are available in all districts except where indicated in the following pages of each service description. All **SmartTouch** services are provided subject to the availability of suitable facilities and equipment.

F

Block The Blocker rejects all incoming calls that are intentionally blocked through Per Call Blocking. Incoming cellular calls are treated as blocked calls and will be rejected. When activated, incoming blocked calls will hear a recording.

Conditions:

- *Available* to customers with Touch-Tone network access only.
- *Available* to customers with prerequisites including Call Display and Name Display.

D

F

Call Forward Busy transfers incoming calls to a specified telephone number when the line is busy.

Conditions

- The forwarded number is programmed by SaskTel and can only be changed by request for a Service Connection Charge.
- Applicable Long Distance charges apply to the Call Forward Busy subscriber.

Call Forward Don't Answer transfers incoming calls to a specified telephone number if the called telephone is not answered after three rings.

Conditions

- The forwarded number is programmed by SaskTel and can only be changed by request for a Service Connection Charge.
- Applicable Long Distance charges apply to the Call Forward Don't Answer subscriber.

Call Forward Remote Activation allows customers to activate Call Forward Universal, deactivate Call Forward Universal and change the forward-to telephone number for Call Forward Universal from a remote location using a Touch-Tone network access.

Conditions

- *Available* to customers with Touch-Tone network access only.
- *Available* to customers with prerequisites including Call Forward Universal.

D

ITEM
150.15**SmartTouch Subscription Services** – *Continued*

F

2. Available SmartTouch Services – *Continued*

Call Forward Universal allows customers to select and program a telephone number where all calls are to be forwarded. When Call Forwarding is activated, the customer's phone will not ring and all calls will be directly forwarded to the forwarded number.

Conditions

- Applicable Long Distance charges apply to the Call Forward Universal subscriber.
- The basic first **SmartTouch** Feature service charge, applies for customer requests to remove the programmed telephone number. (The feature remains on the customer's line)

F

Call Return provides customers with both busy call return and last call return functionality. Call Return will automatically recall a busy line for up to 30 minutes and will provide the number of the last incoming caller.

In Session Activation is an enhancement to Busy Call Return that plays an automated recording saying 'for only fifty cents, SaskTel will notify you when the line becomes free. To activate, press the star key (*) now' every time the customer reaches a busy signal.

Conditions

- *Available* also on a per use basis to customers. The fifty cent charge only applies to non-subscribers (see Always On Services section).
- *Not Available* to customers in Uranium City or Kinoosao.
- *Not Available* for all numbers. Some limitations apply.

The default setting for business customers is to Block In Session Activation (see Deny Always On Services).

Call Waiting alerts the customer with a beeping tone when another incoming call is waiting and the customer already has a call in progress. The customer may hold the first party on the line by depressing the switchhook or link button, answer the second call in complete privacy, and then return to the first call.

ITEM
150.15**SmartTouch Subscription Services – Continued****2. Available SmartTouch Services – Continued**

Data Ident-A-Call allows customers up to three additional directory numbers (including Ident-A-Call numbers) on an access line, in addition to the primary number, each with a distinctive ring. For the duration of an incoming call, Data Ident-A-Call will automatically turn off Call Waiting so that incoming facsimile transmissions are not interrupted by Call Waiting tones.

Ident-A-Call allows customers up to three additional directory numbers (including Data Ident-A-Call numbers) on an access line, in addition to the primary number, each with a distinctive ring.

Intercom enables customers to use their phone as a private intercom. Customers can speak with people located at extension telephones either in the same or different buildings, provided the telephone numbers are the same.

Conditions

- *Available* to existing customers whose voice access is entirely provided via legacy copper facilities.
- *Unavailable* to customers whose voice access is not entirely provided via legacy copper facilities.
- *Unavailable* to new customers or in new instances for existing customers.

Name Display displays the listed name associated with the originating number of an incoming call. The listed name will be abbreviated when it contains more than 15 characters. The displayed name will be the original listed name in the directory.

F

Conditions

- *Available* to customers with prerequisites including Call Display and a capable Name Display phone.
- *Available* to customers with Touch-Tone network access only.

D

Selective Call Accept allows customers to accept calls from a list of twelve pre-determined telephone numbers. For an incoming call to complete, the number must be programmed on the customer's acceptance list. All calls that are not on the accept list receive a fast busy signal.

Conditions

- *Available* to customers with Touch-Tone network access only.

D

- Some restrictions apply to the numbers that can be entered into the Selective Call Accept list.

ITEM
150.15**SmartTouch Subscription Services – Continued****2. Available SmartTouch Services – Continued**

F

Selective Call Reject allows customers to reject calls from a list of twelve pre-determined telephone numbers. Any numbers on the reject list will not terminate on the subscriber's line. Calls that are on the reject list receive a recorded message saying, 'the customer you have dialed has chosen not to accept this call'.

Conditions

- *Available* to customers with Touch-Tone network access only.
- Some restrictions apply to the numbers that can be entered into the Selective Call Reject list.

D

Speed Call 8 or *Speed Call 30* allows the customer to program frequently called telephone numbers, including long distance numbers, into their speed call memory. Customers can dial up to eight or thirty numbers by dialing only one (*Speed Call 8*) or two (*Speed Call 30*) numbers.

Conditions

- *Available* to customers with Touch-Tone network access only.
- *Available* to visually impaired customers at no charge. Restrictions apply for eligibility.

ITEM
150.15**SmartTouch Subscription Services – Continued****2. Available SmartTouch Services – Continued**

F

Three Way Calling allows customers with a call in progress to hold the first party line, dial a second number, and add the third party for a Three Way Call. No activation code is necessary for subscription Three Way Calling customers.

Conditions

- *Available* also on a per use basis to customers (see Always On Services section).
- Any applicable Long Distance charges apply to the originator of the long distance call.

Visual Call Waiting allows customers to see the name and number of the person on Call Waiting before answering the call.

Conditions

- *Available* to customers with prerequisites including Call Display, Name Display, Call Waiting and a Visual Call Waiting capable phone.
- *Available* to customers with Touch-Tone network access only.
- *Available* for the first 'Call Waiting' call only. Screen will not refresh and update if second Call Waiting call occurs in the same call.

4. SmartTouch Always on Services

The following types of Always On services are available:

- Busy Call Return
- Last Call Return
- Three Way Calling

Busy Call Return automatically monitors the number dialed for up to thirty minutes after the customer dials the *66 key. A special ring is heard when the call can be completed.

In Session Activation is an enhancement to Busy Call Return that plays an automated recording saying 'for only fifty cents, SaskTel will notify you when the line becomes free.

Conditions

- *Not Available* to customers in Uranium City or Kinoosao.
- The default setting for business customers is to Block In Session Activation (see Deny Always On Services).

Last Call Return records the phone number of the last caller, whether the call was answered or not.

Conditions

- *Not Available* to customers in Uranium City or Kinoosao.
- *Not Available* for all numbers. Some limitations apply and no charge is incurred for incomplete requests.

Three Way Calling allows customers with a call in progress to hold the first party on line and add the third party for a Three Way Call. The non-initiating party or parties can each join one additional caller up to a maximum of five parties that are allowed to talk at the same time.

Conditions

- *Not Available* to customers in Uranium City or Kinoosao.
- Any applicable Long Distance charges apply to the originator of the long distance call.

F

The following types of Privacy and Security services are available at no charge:

- Call Trace
- Display Name Customized
- Number Replacement
- Per Call Blocking
- Permanent Line Blocking

Call Trace traces the originating number of the last call received and records the number, date and time of the call. This information is stored in a database accessible only to SaskTel Security. Call Trace is provided to all customers at no charge.

D
|
|

Display Name Customized allows customers to change the display of their name. Restrictions apply to the customized name including:

1. Must be a meaningful name representative of the original listed name.
2. Option to choose Private Name Option for customers who subscribe to Non Published Number, but must still display their working number.

F

The following types of Privacy and Security services are available at a charge:

- Alternate Number Delivery
- Operator Assisted Call Blocking

Alternate Number Delivery allows customers to display a different, fictitious number instead of the caller's actual telephone number. Calls to the fictitious number will hear a recording saying, “At the customers request, the number you have dialed is equipped for outgoing calls only.”

Conditions

- *Available* only to a working telephone number at the same premise (thus allowing emergency services such as 911 to identify the proper location of the call).
- *Not Available* to Non-Published customers who choose the Private Name option (see Display Name Customized).
- *Not Available* to customers who subscribe to Permanent Line Blocking.
